

R\_ExpectCovarInfluence

```
graph LR; A[R_ExpectCovarInfluence] --> B[C_ExpectCovarInfluence]; A --> C[ncol]; A --> D[nrow];
```

A diagram illustrating the influence of `R_ExpectCovarInfluence` on three other variables. The central node, `R_ExpectCovarInfluence`, is a black rectangle with white text. Three blue arrows originate from its right side and point to three separate white rectangles with black borders. The top arrow points to `C_ExpectCovarInfluence`, the middle arrow points to `ncol`, and the bottom arrow points to `nrow`.
